PROFESSIONAL SUMMARY

Final-year Bachelor of Technology (Mechanical Engineering) student at the Technical University of Kenya with a multidisciplinary profile spanning mechanical design, embedded systems, software engineering, and AI development. Experienced in building full-stack web solutions, IoT/Arduino systems, and AI-powered agricultural platforms targeting Kenyan smallholder farmers. Additional professional training in AI and Software Development through Power Learn Project Africa and the Zone01 Kisumu Software Engineering Programme. Competitive hockey player in the Kenya Hockey Union league. Passionate about applying engineering and technology to solve real-world challenges across agriculture, sports, and emerging African markets.

EDUCATION

Bachelor of Technology – Mechanical Engineering <i>Technical University of Kenya (TUK), Nairobi</i>	2020 – Present (Final Year, Semester 10)
Artificial Intelligence & Software Development <i>Power Learn Project Africa</i>	Current
Software Engineering Programme <i>Zone01 Kisumu</i>	Current
Kenya Certificate of Secondary Education (KCSE) <i>Ramba High School</i>	2016
Kenya Certificate of Primary Education (KCPE) <i>M.M. Shah Primary School</i>	2011

TECHNICAL SKILLS

Programming Languages:	Python, Go (Golang), JavaScript, C/C++ (Arduino)
Web & Full-Stack:	HTML5, CSS3, Vanilla JS, REST APIs, Node.js concepts
Embedded & IoT:	Arduino Uno, PIR/Ultrasonic sensors, Servo motors, PLC programming
Engineering Software:	SolidWorks (3D CAD), AutoCAD, MATLAB
AI & Automation:	Prompt Engineering, AI Fundamentals, n8n Workflow Automation, Google Apps Script
DevOps & Tooling:	Git, GitHub, VS Code, Linux/Bash
Databases & Backend:	Relational Databases (SQL concepts), API Design, Webhooks
Engineering Domains:	Thermodynamics, Refrigeration & HVAC, Solar Energy, Wind Power, Power Plant Technology

PROJECT EXPERIENCE

Smart Automated Scarecrow (Final-Year Project)

Technical University of Kenya | 2024–2025

- Designed and built a solar-powered automated scarecrow for agricultural bird deterrence.
- Integrated PIR and ultrasonic sensors with an Arduino Uno to detect intruders and trigger servo motors and a buzzer.
- Developed production-grade non-blocking firmware using a state machine architecture.
- Produced full 3D CAD models in SolidWorks and documented the mechanical build phase-by-phase.

AgriPulse AI / AgriPride – AI Agricultural Platform

Personal / Capstone AI Project | 2024–2025

- Architected AgriPulse, a single-file vanilla HTML/JS/CSS decision intelligence web app for Kenyan smallholder farmers.
- Built a six-deliverable AI capstone (AgriPride) covering Executive Brief, Ethical Architecture Dossier, Agent Workflow Diagram, simulation prototypes, Impact Assessment Report, and Strategic AI Blueprint.
- Integrated n8n webhook automation with a Google Apps Script dashboard (6-tab executive dashboard) for farmer data management.
- Ensured compliance with Kenya Data Protection Act and ethical AI frameworks.

Kenya Hockey Union (KHU) League App

Personal Project | 2025

- Developed a broadcast-quality dark-themed web app for the 2025/26 KHU season featuring live standings, fixture data, and league tier navigation.
- Designed and produced professional sports marketing assets (match-day posters, victory posters, social media graphics) for Kisumu Young Stars Hockey Club (KYHC) using HTML/CSS export pipelines.

Executive n8n-Connected Google Apps Script Dashboard

Personal / Automation Project | 2024

- Built a 6-tab Google Sheets executive dashboard connected to n8n cloud automation workflows via webhooks.
- Enabled real-time farmer data ingestion, processing, and reporting for the AgriPride platform.

PROFESSIONAL EXPERIENCE

Logistics Coordinator / Assistant

Gantad Logistics Company | Nairobi, Kenya | 2023

- Coordinated logistics operations, shipment scheduling, and supply chain documentation.
- Applied analytical thinking to optimise delivery routes and reduce turnaround times.
- Managed vendor communications and maintained accurate logistics records.

Technical Support & Wi-Fi Installation Technician

Safaricom Agent Network | Kenya | 2020–2022

- Installed and configured Wi-Fi equipment and last-mile internet infrastructure for residential and SME clients.
- Provided field technical support, troubleshooting network connectivity and hardware issues.
- Trained end-users on equipment operation and basic network management.

SPORTS & LEADERSHIP

Professional Hockey Player – Kisumu Young Stars Hockey Club (KYHC)

Kenya Hockey Union (KHU) League | 2020–Present

- Compete in the national Kenya Hockey Union league representing Kisumu Young Stars HC.
- Created visual brand assets, match-day posters, and sports marketing materials for the club.
- Developed a full KHU league management web application to track standings and fixtures.

CERTIFICATIONS & TRAINING

AI & Software Development Certificate

Power Learn Project Africa | In Progress

Software Engineering Programme

Zone01 Kisumu | In Progress

Algorithms & Data Structures

Zone01 Kisumu – Golang track

KEY COMPETENCIES

✓ Analytical & Systems Thinking	✓ Embedded Systems & IoT
✓ AI-Powered Application Development	✓ Engineering Design (CAD/FEA)
✓ Workflow Automation (n8n, GAS)	✓ Sports Marketing & Visual Design
✓ Team Collaboration & Leadership	✓ Technical Documentation
✓ Attention to Detail	✓ Adaptability & Initiative

LANGUAGES

English	Fluent (Professional)
Kiswahili	Fluent (Native)

INTERESTS

Software Engineering · Artificial Intelligence & Machine Learning · Robotics & Mechatronics · Renewable Energy Engineering · Field Hockey · Sports Marketing & Branding · Digital Transformation in Africa
